

Huaqin Technology Co., Ltd.

Environment, Health and Safety (EHS) Management Policy

Article I Purpose

Huaqin Technology Co., Ltd. (hereinafter referred to as “Huaqin Technology”) is committed to building a green, intelligent hardware platform enterprise, actively fulfilling its responsibilities in environment, health, and safety (EHS), and promoting sustainable development.

With respect to EHS management, Huaqin Technology consistently implements the policy of “people-oriented, sustainability-oriented, and building a refined EHS risk prevention management system.” We commit to integrating EHS management throughout the entire process of the Company’s business operations and to actively promoting upstream supply chain partners to jointly implement this policy, so as to achieve full-chain and full-lifecycle control of EHS risks and value creation.

Article II Scope of Application

- (i) This Policy covers all operating sites of Huaqin Technology and applies to Huaqin Technology and all of its employees.
- (ii) This Policy covers Huaqin Technology’s production and business operations and commercial facilities, products and services, distribution and logistics, waste management, due diligence, mergers and acquisitions, and other related activities.
- (iii) Suppliers, service providers, contractors, and other key business partners of Huaqin Technology are encouraged to jointly implement this Policy.

Article III Management Organization

- (i) Implementation of the Company’s primary responsibility and the principal person-in-charge accountability system

Huaqin Technology strictly implements its primary responsibility for EHS management, rigorously fulfills the principles of managing business operations and managing environmental and safety responsibilities, and establishes an EHS management committee led by the top management under a first-responsibility

system (with the Chairman serving as the Group's primary EHS responsible person and the Vice Presidents of each system serving as the primary EHS responsible persons within their respective systems), thereby reinforcing environmental and production safety management responsibilities at all levels in a top-down manner.

(ii) Comprehensive EHS management mechanism

Huaqin Technology fully implements the system of safety production responsibility for all employees. Employees at all levels strictly fulfill dual responsibilities for their positions, thereby achieving comprehensive safety production management.

(iii) Grid-based safety management team

Huaqin Technology has established a dedicated EHS management team and set up an EHS officer management organization, achieving grid-based management with full coverage of safety management at the smallest on-site operational units.

Article IV EHS Policy

Green environmental protection and the maintenance of sustainable development;

Care for employees and safeguard health and safety;

Firmly comply with laws and regulations and build a strong line of defense for safe production.

Article V EHS Commitments

(i) Continuously improve the environmental management system, promote energy conservation and consumption reduction, assess water resource risks and enhance water use efficiency, increase the utilization rate of clean energy, promote the upgrading of energy-saving technologies, reduce carbon emissions, and contribute to the national "dual-carbon" goals;

(ii) Establish environmental management objectives, including the reduction of non-hazardous and hazardous waste, water resource use and protection, and biodiversity protection, and implement such objectives on a long-term basis;

(iii) Use resources in compliance with national laws and regulations, and minimize the generation of waste and wastewater through the reuse, recycling, and circular regeneration of waste and water resources;

- (iv) Practice green office initiatives, address resource and energy use in office environments, advocate green lifestyles, and promote travel by public transportation and new energy vehicles;
- (v) Strictly comply with government laws, regulations, and policies, implement health and safety management requirements, and continuously improve health and safety management mechanisms;
- (vi) Establish a dual prevention mechanism for risk control and hazard identification and remediation, improve mechanisms for risk prevention and mitigation, enhance the level of safe production, and ensure production safety;
- (vii) Enhance safety awareness, ensure that EHS management requirements are communicated to every employee, provide safety management personnel with training on regulatory updates and fire safety management, and achieve a 100% training completion rate;
- (viii) Develop emergency response plans and response mechanisms for emergency situations, and regularly conduct training and emergency drills to strengthen the capability to respond to accidents and emergencies and to minimize impacts;
- (ix) Establish and improve the responsibility system for the prevention and control of occupational diseases, strengthen the management of occupational disease prevention and control, conduct investigations into work-related injuries, health issues, diseases, and accidents, and take corresponding measures based on investigation results to improve the level of occupational disease prevention and control and to safeguard employees' physical and mental health.

Article VI EHS Management Model

- (i) Systematic model: risk prevention, addressing both root causes and symptoms, systematic advancement, process control, and comprehensive EHS management;
- (ii) Preventive management model: Huaqin Technology adopts a risk management-based approach to strengthen all EHS-related operations, achieve risk prevention, attain EHS management objectives, realize compliant operations, and ensure safe and green production;

(iii) Company-wide and full-lifecycle management model: with respect to product development, raw material procurement and transportation, production processes, pollutant emissions, conservation and reuse of resources and energy, and other stages, strict EHS management procedures and environmental objectives are established, with rigorous process control to substantially achieve full-process control of hazard sources and pollution sources. The scope of EHS management covers all employees, and all personnel are required to participate in EHS activities.

Article VII EHS Control Measures

Huaqin Technology formulates annual objectives and management plans each year. In accordance with the Company's operational processes and by adopting the PDCA management control approach, it comprehensively identifies EHS risks and establishes EHS risk identification, evaluation, and control mechanisms to achieve preventive control in advance. The Company also actively promotes the digitalization of EHS management and continuously improves EHS management performance.

Article VIII Systems and Frameworks

Huaqin Technology has established and implemented the ISO 14001 Environmental Management System, the ISO 45001 Occupational Health and Safety Management System, and the ISO 50001 Management System. Upon approval by the EHS Management Committee, the Company has established and implemented operational mechanisms including the *Safety Production Objective Management Specification (BST-W00471)*, the *Supervision and Assessment Specification for the Fulfillment of Company-wide EHS Responsibilities (BST-W00564)*, the *Compliance Obligation Identification and Evaluation Control Procedure (BST-W00480)*, the *Risk Assessment and Control Management Specification (BST-W00477)*, the *Fire Safety Management Specification (BST-W00554)*, the *Emergency Preparedness and Response Control Procedure (BST-P00057)*, the *Hazard Identification and Remediation Management Specification (BST-W00555)*, the *Work-Related Injury and Occupational Disease Incident Management Specification (BST-W00549)*, and the *Environmental Aspect Identification and Evaluation Control Procedure (BST-W00501)*. These mechanisms

are organized, monitored, and implemented by the EHS team and are continuously iterated and optimized.

Article IX Review and Revision

Huaqin Technology shall regularly review this Policy, update it where necessary, and approve and issue it accordingly.
